Discover Jolie Lite

Jolie Lite collects the most requested digital solutions through years of experience in the development of customized event management softwares.

The software allows you to manage **physical events, streaming and meetings**. It provides the tools to generate dynamic forms, calendars, e-mail templates for personalized invitations, landing pages, websites and much more.

The data recorded in the system can be constantly monitored through intuitive graphs on the dashboard. The result is extremely flexible, agile and accessible software.

Dynamic features: e-mail

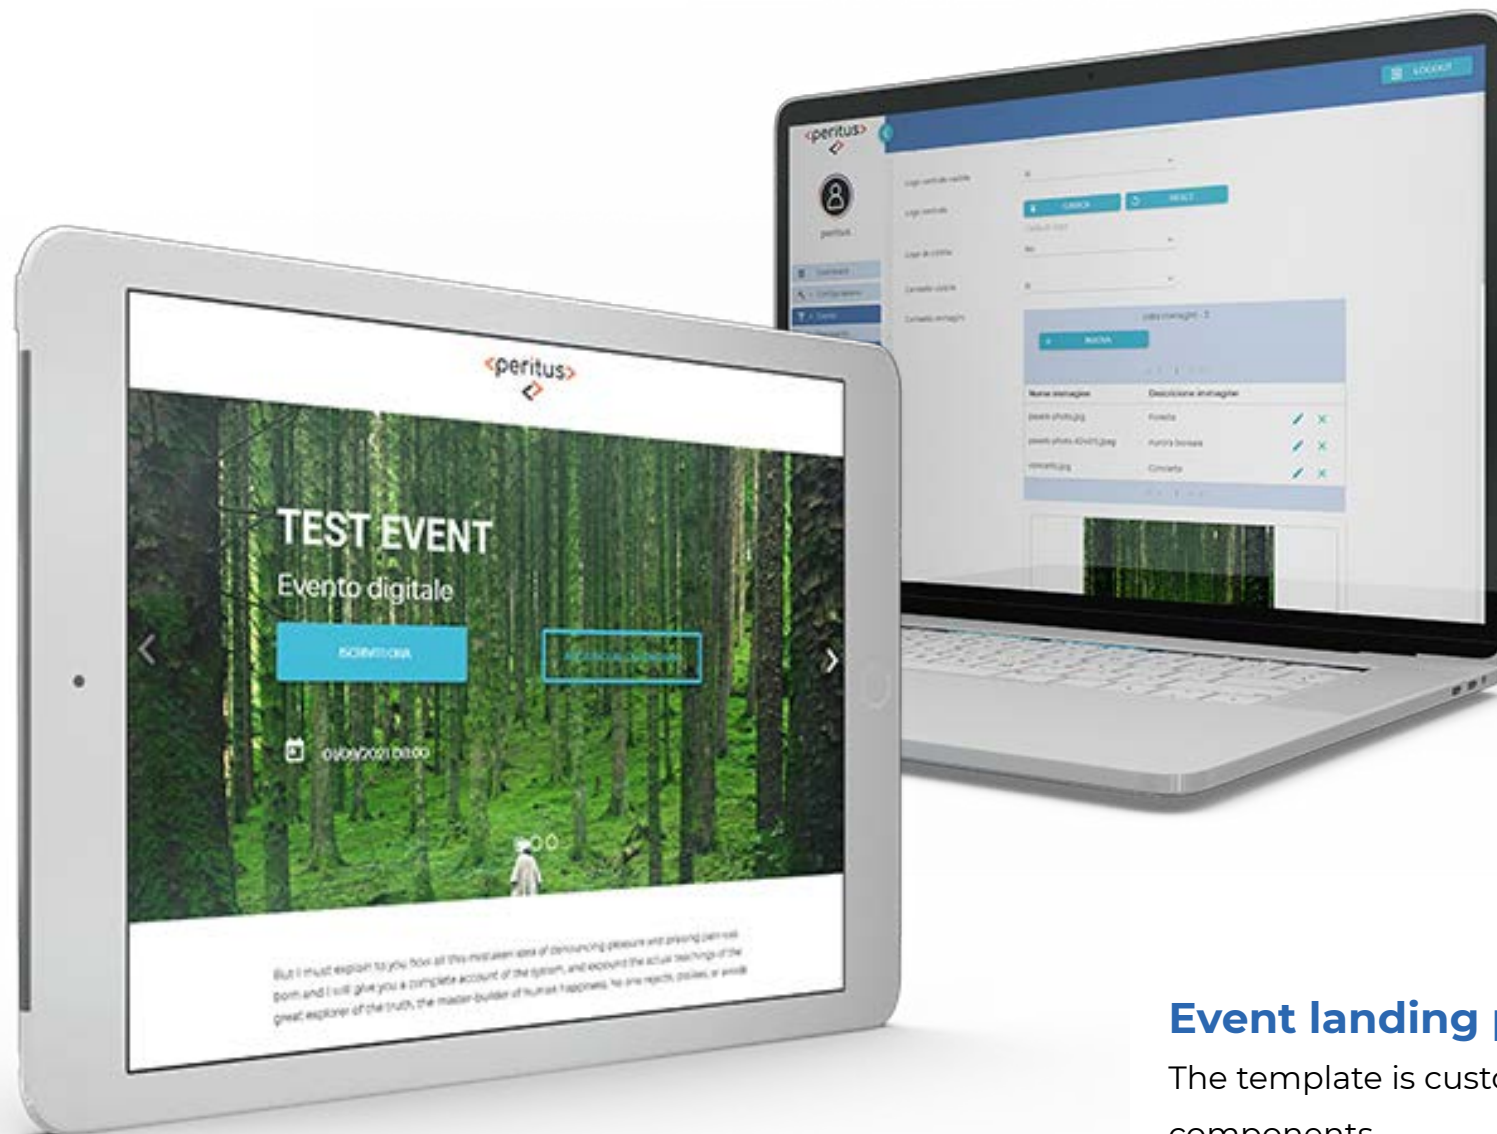

Customize forms, fields, e-mails, and landing pages easily and independently!

e-mail template

Create the templates you want: save the date, invitation, personalized reminder and much more.

Integrated customer database

useful for the ordinary management of events or in the absence of corporate CRM

Property release app

both on the server and client side

SaaS - Software as a service

access to the provider's cloud-based software. Fast implementation and constant availability of the latest updates

About us

We are a group of professionals who propose digital solutions to management problems. We develop customized software, as well as web and mobile applications for companies; we build the structure and take care of the contents of corporate and personal websites.

Since 1997 we have been developing software for event management and CRM, warehouse logistics, company fleets, dosimetry and radiation protection, as well as apps for hospitals, information apps, tours and geolocation apps and interactive product sheets.

We create scalable, configurable and expandable products to ensure maximum flexibility for your requests.

Our customers include BMW, Ducati, Maserati, Volkswagen, Festival della Scienza, Italian Tour, Espada / Islero, Corner Polo Storico, RG Impianti, Trelleborg and various hospitals throughout Italy.
